

METRIC SYSTEMS[®]

C O R P O R A T I O N

CORPORATE OVERVIEW

INTRODUCTION

Metric Systems Corporation (MSC) is a profitable, self-financed small manufacturing business located in North County San Diego, California.

MSC specializes in designing and manufacturing spectrum-independent wireless networking, equipment, and system solutions for government and industry. Our purpose-built, requirement-based terrestrial, satellite, and mobile wireless equipment solutions are easily pre-staged and transported to the field for operation.

KEY CUSTOMER BASE

GOVERNMENT

U.S. Customs & Border Protection: Tactical LMR & Video Networks

U.S. Secret Service: Airborne Communications

U.S. Navy: Wide-Area UxV Test & Evaluation Platform

U.S. Navy: Inboard Secure Vessel Communications

PRIME-SUB CONTRACTING

Alliant Techsystems, Inc. (ATK): Foreign Military Sales Air Defense Communication Systems

Cubic Corporation: Ground-to-Air Networking

General Dynamics Information Technology, Inc.: Tactical Test Range HD Video Wireless Systems

INDUSTRIAL DIRECT SALES

LG-Ericsson: Integrate LTE, WiFi, & Broadband Equipment & Systems

Microsoft Corporation: Local & Wide-Area Cognitive Radio Networks

PRODUCT OVERVIEW

SAFARI™ OASIS™

Safari™ Oasis™ is a complete system approach for building wide and local area wireless and wired networks. The Oasis™ system enables users to quickly and economically build scalable, reliable, and secure communication networks to meet nearly any wireless application.

This approach allows users to design, implement, and maintain a range of simple to complex voice, video, and data backbone networks to efficiently support single or multiple independent users over the most challenging topologies.

RHINO BOX™: ENVIRONMENTALLY CONTROLLED EQUIPMENT ENCLOSURES

The Rhino Box™ provide a safe, secure all-weather transport and environmentally controlled operating platform for commercial and industrial-grade electronic equipment. This ruggedized transport enclosure system supports continuous operation in ambient air temperatures exceeding to 130°F.

SAFARI™ WIRELESS CONTROLLER

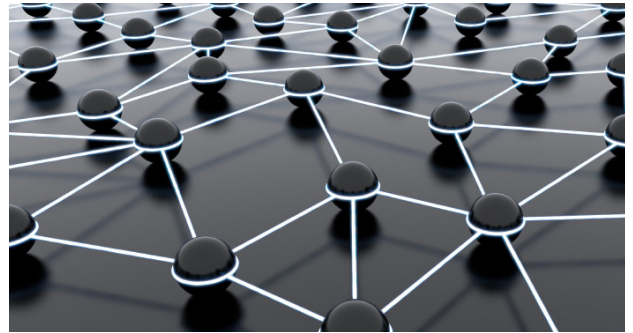

The Safari™ Wireless Network Controller is a universal IP-based network appliance for implementing indoor and outdoor wireless solutions. The Safari™ Controller provides a “one box” unified solution for integrating broadband infrastructure and last link connectivity into a single, cost effective, manageable network.

SAFARI™ STREAMER™

The Safari™ Streamer™ is a video networking appliance enabling error-free delivery of HD video streams over any error-prone network path.

Safari™ Oasis™

Spectrum & media independent voice, video, and data end-to-end systems.

Rhino Box™

Move from integration to deployment in one step.

Safari™ Wireless Networking Controller

Media independent software-based gateway, controller, and router.

Safari™ Streamer Video Networking Appliance

Providing error-free video, audio, and data streaming.

Tailored solutions are our specialty. Metric Systems Corporation is an expert in wired/wireless networking and RF equipment and system design. We welcome the opportunity to discuss your specific requests.
