

FOR IMMEDIATE RELEASE

## **Rhino Box® Receives Official Trademark**

VISTA, Calif. August 5, 2011. - To honor its newly expanded product line of Rhino Box® Integrated Transport and Equipment Shelters, Metric Systems Corporation has received its registered trademark #4,000,969 dated July 26, 2011 from the U.S. Patent and Trademark office to trademark the Rhino Box® catchphrase and logo.

This step to further increase its intellectual property holdings supports Metric Systems Corporation (MSC) as its standardized product line grows to encompass requirements-built wireless networking system solutions that support interoperability and function the world over. The Rhino Box® shelter is an all-weather environmentally controlled equipment enclosure designed to support the transport and safe operation of Commercial-Off-The-Shelf (COTS) electronic equipment in harsh environments.

Built around the rugged, field-proven Hardigg® MAC Rack transportable enclosure, MSC adds its 20+ years of expertise in designing, manufacturing, and deploying mission critical communications systems to provide you with an economical and rugged all-weather deployment platform for electronic and communications equipment.

Use the Rhino Box® shelter to pre-stage standalone system solutions and rapidly respond to critical deployment requirements anytime, anywhere.

### About Metric Systems Corporation

Metric Systems Corporation (MSC), a privately held Vista, California corporation founded in 1992, designs and builds specialty infrastructure and Edge domain wireless networking communications solutions for government, industry, and commercial interests.
